SCP for:

Redevelopment Area / Street Improvement Plan Name

I have reviewed the full contents of this Stormwater Control Plan (SCP) including all supporting documents. I have determined that the SCP has been prepared in accordance with the requirements of the San Francisco Stormwater Management Requirements and Design Guidelines (SMR) and that the attached construction documents adequately represent the proposed post-construction stormwater management controls. I have read, understand and acknowledge the conditions below, and have informed the Owner of these conditions.

Applicant's Name (design professional)

Applicant's License Number

Stamp or Seal: (Signature and date for Final SCP)

Additional Certifications (Final SCP ONLY)

- ☐ I have provided a draft **Maintenance Agreement** (or equivalent) to the property owner for recordation.
- ☐ I will conduct periodic observations of BMP construction and will submit the signed **Certification of Acceptable Construction** after project completion with the Maintenance Agreement package.

APPLICANT ACKNOWLEDGEMENT:

1. The SFPUC review of the SCP is limited to ensuring compliance with the stormwater management approach(es), method(s), and sizing of proposed BMP(s) as required by the SMR. The Owner is responsible for ensuring that the proposed project obtains all necessary permits, and that the constructed facility complies with all Development Agreements, applicable codes, operates properly, and protects public health and safety.
2. All projects that trigger the SMR are required to submit a Stormwater Control Plan (SCP) directly to the SFPUC. The SCP submittal is separate from any documentation submitted to Public Works (PW) for the Street/Park Improvement Permit process.
3. **PW will not issue any Street/Park Improvement Permits until the SFPUC approves the Final SCP, unless otherwise specified by the project's Development Agreement.**
4. The Owner may be responsible for securing or coordinating maintenance funding for all BMPs constructed in compliance with the SMR as specified by the project's development agreement.
5. All projects that are required to submit a SCP for SFPUC approval should request appropriate City Agency plan review.
6. All projects proposing to use on-site alternate water sources (i.e. rainwater harvesting) to meet non-potable demands must submit a SFPUC Water Budget Application (available online at <https://sfpuc.org/construction-contracts/design-guidelines-standards/onsite-water-reuse>) to the Non-potable Water Program.
7. If rainwater harvesting is proposed, the SFPUC will review for size, approach and routing only. RWH systems and components will be reviewed by: DBI PID for piping and fitting code and by the Department of Public Health for treatment.
8. Content in SCPs is subject to San Francisco Administrative Code Chapter 67 (i.e., Sunshine Ordinance).
