

A part per million is like

💧 **one drop**

of water in a bathtub

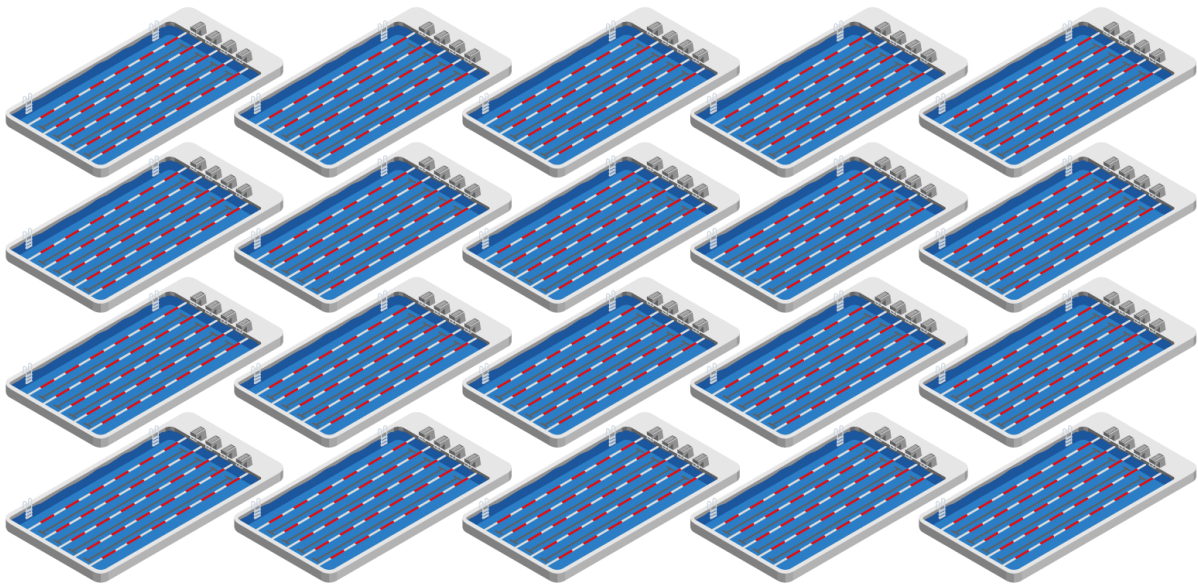

A part per billion is like  
 **one drop**  
of water in a backyard  
swimming pool

A part per trillion is like

 **one drop**

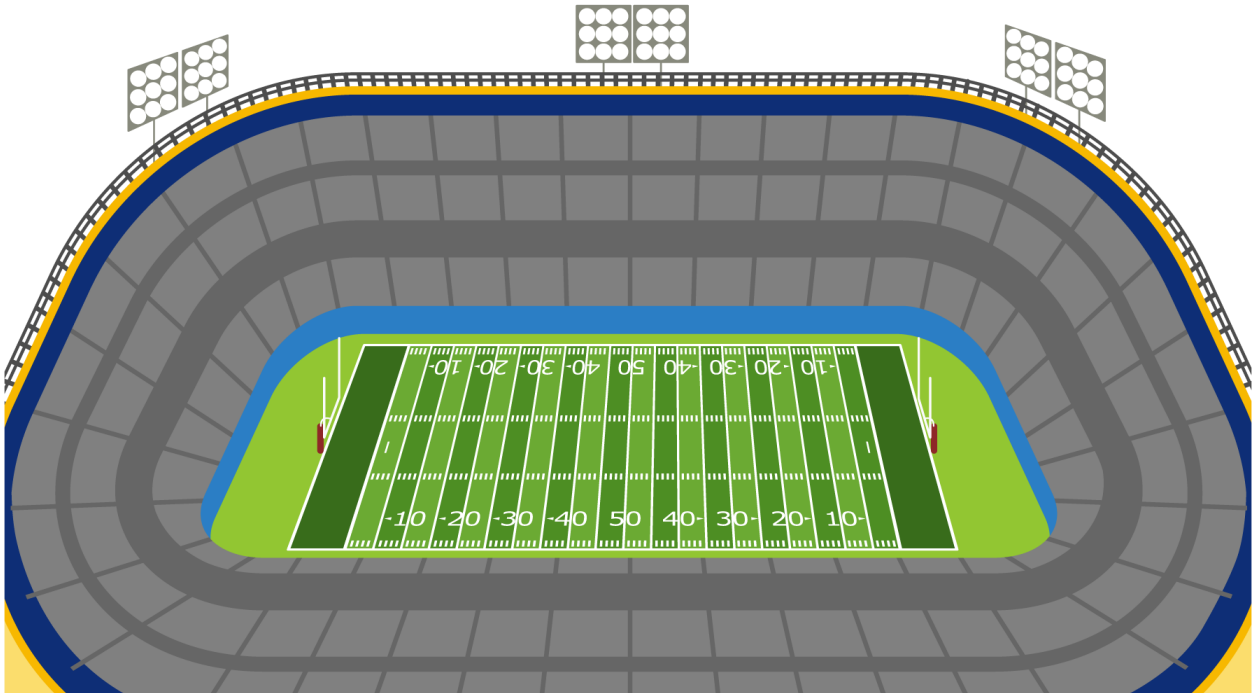

of water in 20 Olympic-sized swimming pools

A part per quadrillion is like

four drops

of water in a football stadium full of water

A part per quintillion is like

 **one drop**

of water in ~4 Lake Tahoe's  
(38 trillion gallons of  
water in Lake Tahoe)
