

Construction Notice & Traffic Detour WW-645R **Westside Pump Station Reliability Project Update**

Description: Upgrades continue at the Westside Pump Station, our all-weather facility that pumps the sanitary and stormwater flow from the west side of the City to the Oceanside Treatment Plant. The WSS and associated facilities have been in service for numerous decades in the harsh marine environment. The aging mechanical and electrical infrastructure must operate daily to maintain water quality requirements.

Construction activities at the Pump Station will require a traffic detour on Great Highway northbound between Skyline Blvd. and Sloat Blvd.

When: The anticipated start for **TRAFFIC DETOUR** is the **third week of August 2025, and will be continuously in effect through Fall 2026, 7 days a week, 24 hours daily.** Weather and/or construction issues may impact the schedule.

Where: Construction activities will occur between Skyline Blvd. and Sloat Blvd. on Great Highway northbound.

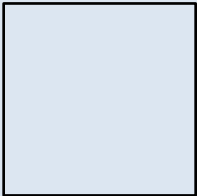

Contact: SFPUC Communications, (415) 554-3233, ssip@sfgwater.org. After hours: Filip Filipic, Anvil Builders, (510) 715-0163.

What to expect:

- **TRAFFIC:** For public and worker safety, signage will be present to direct traffic.
- **ACCESS:** There may be temporary delays.
- **NOISE/VIBRATION:** While the contractor is required to abide by the City's noise and vibration ordinances, neighbors should expect some noise and limited dust during this work. The project team will work to minimize disruption to normal neighborhood activity; however, there will be occasional inconveniences due to heavy equipment movement and other construction activities.
- **SERVICE:** No interruption in sewer service is expected during construction.
- **Workdays and hours** (weather permitting) are Monday – Friday, and occasional Saturdays, 7:00 a.m. to 4:00 p.m.

Estimated Completion: The project continues to make headway and the current estimate for completion: end of 2026. Learn more at [SFPUC.gov/westsidepump](https://sfpuc.gov/westsidepump)
