

SEWER SYSTEM IMPROVEMENT PROGRAM | Grey. Green. Clean.

# Mariposa Pump Station Improvements Project

## Our Sewer System Upgrades are Underway

The San Francisco Public Utilities Commission (SFPUC) operates a combined sewer system that collects and treats wastewater (sewage and stormwater). Originally built in 1954, the Mariposa Pump Station (MPS) is a dry-weather pump station that pumps wastewater from the surrounding area to the Southeast Treatment Plant for treatment.

The Mariposa Pump Station Improvements Project will remove the existing pump station and construct a new pump station at the same location to accommodate full buildout of the Mission Bay, including the new Warriors Arena and other nearby communities including Dogpatch and the Potrero Hill neighborhoods. These facilities are a critical component of San Francisco's wastewater operations and planned upgrades will allow us to meet the current seismic standards and sea-level rise requirements in San Francisco, as well as continue offering reliable, high-quality service to all who live, work and play in San Francisco.

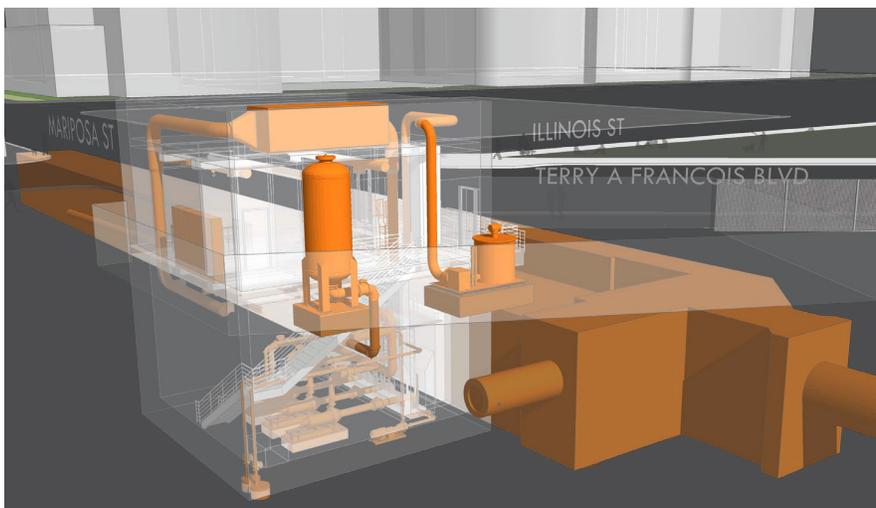

## Estimated Construction Schedule

2020	2021	2022

WINTER 2019 TO FALL 2022  
(SUBJECT TO CHANGE)

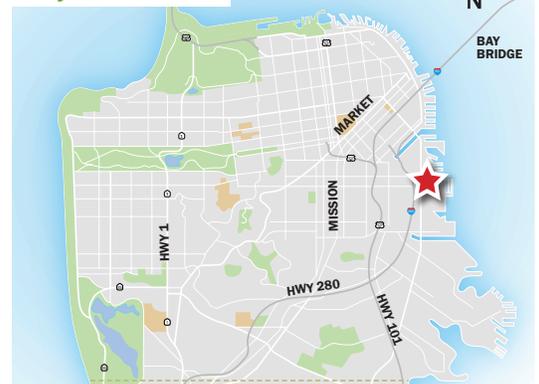

### PROJECT BENEFITS:

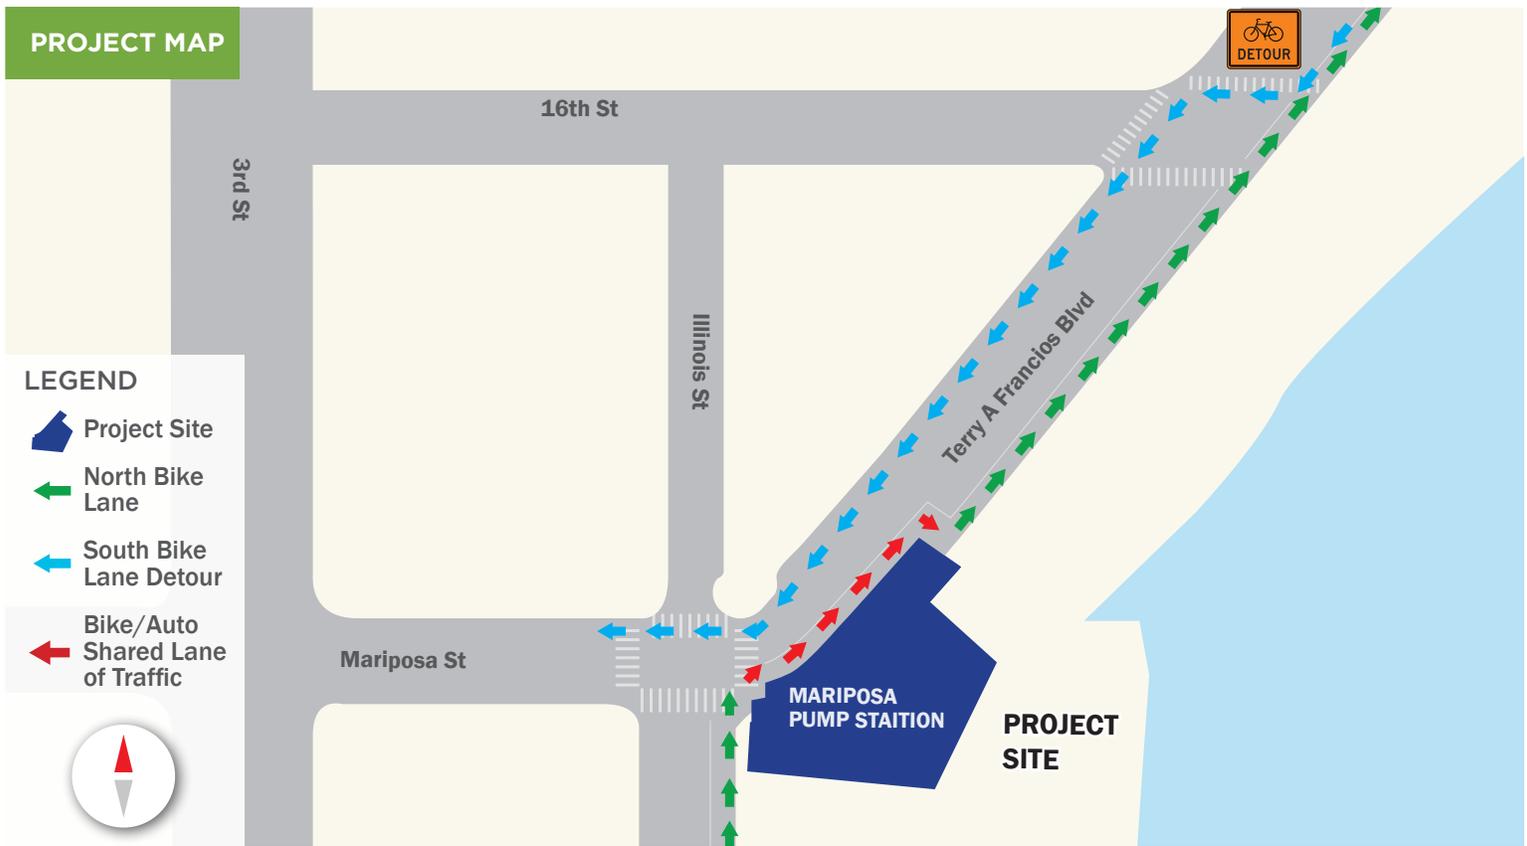

- Maintain critical sewer system services by increasing the existing dry weather capacity of the MPS
- Meet seismic standards and sea level rise requirements
- Increase sewer system reliability.
- Protect water quality and aquatic life in the Bay.

The Mariposa Pump Station upgrades include both above and below ground facilities.

### Project Location

## What to Expect

To minimize construction duration and impacts to community, construction crews will be working Monday through Friday between 7:00 am and 5:00 pm. Some weekend work may be required, at which time advance notice will be provided.

- **SEWER SERVICE** in the area will NOT be interrupted during construction.
- **PARKING:** Street parking will be impacted near construction zones. “No-parking” signs will be posted 72 hours in advance.
- **TRAFFIC:** During construction, vehicular, bicycle, and pedestrian traffic may be impacted. If necessary, through traffic may be temporarily detoured around the construction site.
- **MUNI:** No bus impacts are expected at this time.
- **ACCESS:** Businesses and residents in the work zone will maintain access to their driveways and entrances.
- **NOISE:** Neighbors may hear construction noise periodically. Noisy work will be conducted in compliance with the San Francisco Noise Ordinance.
- **ODORS:** If necessary, odor control measures will be in place during construction.
- **NOTICE:** A 30-day and 10-day notice will be distributed prior to construction to residents and businesses within the project area detailing traffic impacts and project details.

## About the Sewer System Improvement Program

The Mariposa Pump Station Improvements Project is part of the Sewer System Improvement Program (SSIP), a 20-year, multi-billion-dollar citywide investment required to upgrade our aging sewer system. The program is the result of an extensive community planning process and will ensure a reliable, sustainable and seismically safe sewer system now and for generations to come. For more information on SSIP and to stay up to date, please visit [sfpuc.org/mariposapump](https://sfpuc.org/mariposapump).
