

STEP 1: WATER BUDGET APPLICATION SINGLE-BUILDING NON-POTABLE WATER SYSTEM

This application is intended for projects proposing a single-building non-potable water system. In accordance with Article 12C of the San Francisco Health Code, any project that includes an alternate water source system, must submit water budget documentation to the San Francisco Public Utilities Commission (SFPUC) for review prior to issuance of a permit from any other City department. This application requires information on the proposed system’s alternate water sources, non-potable applications, and preliminary implementation plan. Any modification to the project’s proposed alternate water sources and non-potable applications will require a resubmittal of your water budget application to the SFPUC.

For more information, please visit www.sfpuc.org/npo. To submit your water budget application, please email nonpotable@sfpuc.org.

Single-family or two-unit residential properties are not required to complete a water budget application. Please visit www.sfpuc.org/conservation to learn about SFPUC’s residential rainwater and graywater programs.

Project Information	
Construction Type	<input type="checkbox"/> New Construction <input type="checkbox"/> Remodel/Major Alteration <input type="checkbox"/> Re-plumbing only
Occupancy Type:	<input type="checkbox"/> Multi-Family Residential (3 units or more) <input type="checkbox"/> Commercial Use <input type="checkbox"/> Mixed Use (includes commercial & residential)
Residential Occupancy Square Footage (total at build out):	
Commercial Occupancy Square Footage (total at build out):	
Date:	
Number of units:	
Project Name:	
Service Address:	
Accessor’s Block & Lot No./Parcel APN	
Site/Bldg Permit No. (if filed):	
Planning Application No.:

The SFPUC has developed an Excel-based calculator to help projects quantify available alternate water sources and non-potable water demands. **Please visit www.sfpuc.org/npo to download the single-building calculator.**

Total Water Demand for Project	
Include potable and non-potable demands (gpy)	
Qty (gpy):	

Onsite Water Sources to be Used		
Indicate volumes in gallons per year (gpy)		
<input type="checkbox"/> Rainwater	Qty:	
<input type="checkbox"/> Stormwater	Qty:	
<input type="checkbox"/> Graywater	Qty:	
<input type="checkbox"/> Foundation Drainage	Qty:	
<input type="checkbox"/> Blackwater	Qty:	
<input type="checkbox"/> Condensate	Qty:	
<input type="checkbox"/> Other:	Qty:	
TOTAL	Qty:	

**WATER BUDGET APPLICATION
SINGLE-BUILDING NON-POTABLE WATER SYSTEM**

Proposed Onsite Non-Potable Applications Indicate volumes in gallons per year (gpy)		
<input type="checkbox"/> Toilet/Urinal Flushing	Qty:	
<input type="checkbox"/> Spray Irrigation	Qty:	
<input type="checkbox"/> Subsurface Irrigation	Qty:	
<input type="checkbox"/> Drip Irrigation	Qty:	
<input type="checkbox"/> Decorative Fountain	Qty:	
<input type="checkbox"/> Cooling Application	Qty:	
<input type="checkbox"/> Drain Trap Priming	Qty:	
<input type="checkbox"/> Clothes Washing	Qty:	
<input type="checkbox"/> Other:	Qty:	
TOTAL	Qty:	

Supplemental/Make-up Water Required to Meet Non-potable Demands	
If onsite water volumes are less than non-potable application demands, supplemental water from SFPUC will be required. To calculate the quantity of supplemental water needed, subtract the volume of alternate water sources to be used from the volume of non-potable application demands.	
<input type="checkbox"/> Year-Round	<input type="checkbox"/> Summer (Apr-Oct)
Qty (gpy):	

Preliminary Non-potable Water System Description	
Provide a brief project description including proposed conceptual design and treatment processes:	
Identify permittee (entity responsible for compliance with Article 12C):	
Estimated cost for treatment system; estimated cost for conveyance system; estimated annual cost for operations and maintenance:
