# Green Infrastructure Grant Program:
# Board of Supervisors Quarterly Update

July – September 2026

**Program Summary**

The San Francisco Public Utilities Commission's (SFPUC) Green Infrastructure Grant Program funds the design and construction of green stormwater infrastructure on large properties and in the public right-of-way, with the goal of reducing stormwater runoff while delivering public benefits that enhance the quality of life for all SFPUC rate payers. Project types can include permeable pavement, bioretention, rainwater harvesting, rain gardens, and vegetated roofs.

To receive funding under the Grant Program each project must:

1. Be located on a parcel and/or in public right-of-way that discharges to an SFPUC-owned and operated sewer system service area.
2. Manage stormwater runoff from a minimum impervious area of 0.5 acres.
3. Capture the 90$^{th}$ percentile storm (0.75-inch depth) with the proposed green infrastructure features.
4. Provide at least two (2) of the identified co-benefits from the program list, which can be found in the Grantee Guidebook.
5. Have a grant team that collectively demonstrates a history of successful project implementation and has previous experience designing, constructing, and/or maintaining green infrastructure, and be in good standing in all currently active Green Infrastructure Grant Program projects.

More information on the Grant Program can be found at http://www.sfpuc.gov/gigrants.

**Quarterly Highlights**

During the reporting period, two projects completed construction (Visitacion Valley Middle School and Thurgood Marshall High School), seven projects continued construction (Buchanan Street Mall, Buena Vista Horace Mann K-8, Flynn Elementary School, Cornerstone Cambridge Campus, Visitacion Valley Elementary School, El Dorado Elementary School, and Panorama Elementary School), three projects started design (Cesar Chavez Elementary School, Roosevelt Middle School, Innes Avenue Rebuild), and five projects continued design and community engagement (Louis Sutter Playground, Jackson Playground, Marina Improvement Project, Mariners Village Condominiums, and Church of the Visitacion).

**Program Statistics (February 2019 – September 2026)**

Since the launch of the Green Infrastructure Grant Program in February 2019, the SFPUC has awarded grants to 33 projects with a total of approximately $32.7M in funding. The following program summary statistics are as of September 30, 2026:

- Applications Received: **33**
- Applications Awarded: **33**
- Active Projects: **19**
- Projects Completed: **15**
- Total Funding Awarded: **$32.69M**
- Potential Stormwater Captured by Awarded Projects: **19.25 million gallons per year**
- Property Site Visits Conducted by Technical Team: **71**
- Site Opportunities Assessments Completed: **44**

**Co-Benefit Summary**

Each project is required to select a minimum of two (2) of the following community and environmental benefits. Definitions for each co-benefit can be found in the Grantee Guidebook.

- Total Estimated Student Population Reached by School Projects: **>6,000 students**
- Number of Public Schools Awarded Grants: **13**
- Number of Public Parks Awarded Grants: **7**
- Projects in High or Moderately Burdened Environmental Justice Communities: **23**

| Co-Benefit Achieved | Number of Projects |
